

YouTube Set-Up Guide

In this guide we will go over how to use YouTube for those of you who want to download Facebook Livestreams in order to repurpose that content.

{ USE YOUTUBE TO REPURPOSE LIVESTREAMS }

Once you've downloaded your Facebook Livestream via Facebook...

1. Go to www.youtube.com and click "Sign Up" or "Sign In" at the top right of the page.

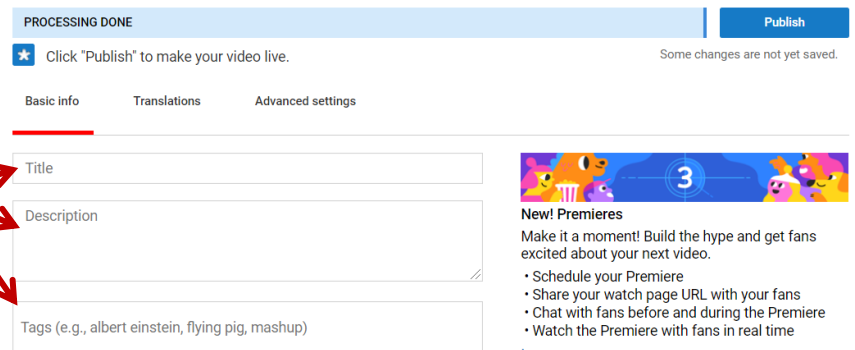

2. Next, click the camera icon and then click "Upload video."

3. Drag and drop your Facebook Livestream file into the upload box.

4. Your video will start to upload and on this screen you'll have the chance to name your video, add a description, and add tags that relate to your video content.

5. Scroll down to the bottom of the page to select a thumbnail for your video. YouTube will automatically give you three options and you can select one of those.

6. When your video is finished uploading, click the blue "Publish" button at the top right.

7. On the next screen, you'll find different ways to share your video.

If you want to embed your video on your blog or website, for example, click "Embed" and then copy the embed link.

Share Embed Email

```
<iframe width="560" height="315" src="https://www.youtube.com/embed/WHYjIreq4Qs" frameborder="0" allow="accelerometer;
```

SHOW MORE

8. Then, paste the embed link where you'd like to show your video.
